

Solution spotlight

Enhancing business performance through strategic system selection

With numerous ERP systems available, identifying the right solution for your business can be challenging. Our ERP team helps you evaluate your options, manage vendor assessments and supports a seamless transition to new ERP systems.

Key considerations when selecting an ERP:

- **Don't follow the trend:** Choose a solution that is aligned with your business requirements - selecting an ERP system based on its current sales ranking can lead to unsatisfactory results.
- **Consider customisation:** How critical are they - and to what extent might they hinder future system upgrades and internal enhancements?
- **Keep scalability and integration front of mind:** The selected ERP system must scale with your business and integrate effectively with your existing systems.
- **Consider the deployment model:** When migrating to cloud, assess the technology landscape to ensure compatibility and future-readiness.
- **Review and validate:** Comprehensive reviews and validations are essential to avoid costly mistakes.
- **Carefully calculate costs:** Ongoing maintenance, updates and training can add significantly to total cost of ownership.

How can we help?

Expert guidance

We use our extensive ERP system selection experience to guide you through every step of the process.

Industry experience

We have experience across verticals including hospitality & catering, aviation, insurance, HVAC, technology and marine construction.

Project management & support

We use our expertise to manage projects and support implementation processes.

Our approach

Benefits:

- Improves process alignment
- Increases user adoption
- Avoids last-minute surprises
- Keeps implementation on track

Why choose us?

20+

successful system selection projects

Client base across MENA region

Experience in major tier-1 ERP software - SAP, Oracle, MS Dynamics and many more

63+

years of team experience
